FIELD HOCKEY CANADA NATIONAL TEAMS
SPORT ACCIDENT
EFFECTIVE: April 1, 2022 to April 1, 2023

Sport Accident:

This coverage is for an accident that occurs while you are playing or training.
You will need to fill in and submit the Accident Claim Form within 30 days of the accident and get proof of Claim, such as a physician's note within 90 days. Expenses for rehabilitation will last up to 52 weeks.

Our insurance broker (Arthur J. Gallagher Canada) can walk you through this process and you may be eligible for coverage beyond other personal insurance you might have in place (i.e work, school, government).

If you suffer an accident, it is best to email Brent Brandham at Gallagher brent_brandham@ajg.com and copy your HP Manager. The Sport Accident Claim Form and the policy details are available from HP Manager or https://srim.ca/sports-accident-claims

Field Hockey Canada's Sport Accident insurance is excess coverage. It will cover expenses not covered by your provincial health care or personal insurance policy (if you have one).
If you suffer an accident while on tour with the Canadian team, your travel manager will get you to fill out the Sport Accident Claim form while on tour and help you with the details of your claim.

Field Hockey Canada will pay for doctor or hospital visits while on tour, but you will have to file a claim with your own personal medical insurance company and/or your provincial medical service plan when you return to Canada.

Once your claim is settled and you receive payment, you will be required to repay Field Hockey Canada for any expenses you were able to retrieve.

Please note that you are NOT covered for a Sport Accident Claim if you are NOT playing with the Canadian National Team. For example, you are NOT covered while playing with an International team in an overseas league, tournament, games or training or with a Canadian Club team in an overseas tournament, games or training. You must obtain your own medical travel insurance. Our broker, Gallagher, is available to help with these travel medical needs.
