1. The Report

- a. All reports of any offence against the FIH Code of Conduct shall be made to the Tournament Director.
- b. The TD is to determine the level of the offence.
- c. A report can be received by the TD from any person but if received later than 24 hours after the occurrence of the conduct said to constitute the offence the TD must exercise discretion as to whether to accept such a report. That discretion is to be exercised taking into account the seriousness of the reported behaviour and the reason for the delay in making the report.
- d. If the incident occurs during the final day of competition, or after the completion of the event, the TD will submit an incident report to the FHC Chief Executive Officer who will work with the FHC Officials Committee and the FHC Disciplinary Group to determine next steps.

2. Principles of Natural Justice

The principles of natural justice apply in the following way:

The TD will advise the Team Manager of:

- the fact of the report of an offence
- the identity of the team member(s) reported
- the level of the offence
- the time and place of the hearing
- details of the conduct and the mode of proof of it
- if the report was received later than 24 hours after the occurrence of the conduct said to constitute the offence the TD must state the reasons for the exercise of the discretion to accept the report. No appeal from the exercise of that discretion is available.

3. The Hearing

- a. The TD must chair the meeting (subject to delegation for reason of conflict of interest).
- b. The hearing must be attended by the person who is the subject of the report and one team representative if they desire.
- c. The TD must outline the evidence relied on to support the report including showing any video footage that may be available.
- d. The subject of the report is to be asked for her / his response to the report, ie does (s)he accept the offence as alleged or not, and (s)he must be permitted to present material as to either or both of the fact of the offence or penalty.
- e. Should the person who is the subject of the report fail to attend the hearing, the hearing shall take place in the absence of that person and the fact of the failure to attend shall be taken

into account in the determination of the appropriate penalty in the event that an offence is found to have been committed.

4. The Decision

- a. Following the hearing, the TD will come to a decision.
- b. The decision should be in writing and read to the person the subject of the report by the TD (through an interpreter if necessary). It should deal (at least) with the following matters:
 - i. whether or not the subject of the report accepts the breach of the Code of Conduct
 - ii. if the subject of the report does not accept the breach, a finding as to whether a breach has occurred and why.
- c. Should it be found (or agreed) that an offence has been committed either the minimum penalty will be imposed or, at the entire discretion of the TD, a greater penalty. If a greater penalty is being considered then:
 - i. the disciplinary history of the subject of the report
 - ii. the attitude of the subject of the report at the hearing
 - iii. any penalty already incurred, eg if a personal penalty card was given during the match the length of time of any suspension served under that card
 - iv. the seriousness of the offence by comparison with other offences at this levelwill be taken into account by the TD in imposing a greater penalty and details of which will be set out in the written decision.

5. Definition of the Penalty

A clear definition of the penalty will include:

- i. the number of matches for which the subject of the report is suspended
- ii. the date of commencement of the suspension
- iii. a statement whether, in the view of the TD, any additional period of suspension or other penalty to take effect beyond the conclusion of the tournament should be imposed or may be appropriate; and, if so:
 - a statement that the decision to impose any further suspension or penalty is referred to the FHC Chief Executive Officer for further consideration by the FHC Disciplinary Committee, and
 - a summary of the TD's reasons that may justify the imposition of an additional suspension or other penalty.

APPENDIX 5 | FIELD HOCKEY CANADA

CONCUSSION MANAGEMENT PROTOCOL

The following is an excerpt from the Field Hockey Canada Concussion Management Protocol. The full document, and associated information, may be accessed at www.fieldhockey.ca/athlete-documents/

1. Head Injury Recognition

A concussion should be suspected:

- ☐ In any athlete who sustains a significant impact to the head, face, neck, or body and demonstrates ANY of the visual signs of a suspected concussion, or reports ANY symptoms of a suspected concussion as detailed in the **Concussion Recognition Tool 5**.
- ☐ If a player reports ANY concussion symptoms to one of their peers, parents, teachers, or coaches, or if anyone witnesses an athlete exhibiting any of the visual signs of concussion.

Concussion Red Flags:

If an athlete exhibits or reports any of the following, call an ambulance for emergency medical assessment.

- ☐ Neck pain or tenderness
- ☐ Severe or increasing headache
- ☐ Deteriorating conscious state
- ☐ Double vision
- ☐ Seizure or convulsion
- ☐ Loss of consciousness

2. On Field Management

Basic First Aid

- ☐ DRSABCD
- ☐ Cervical Spine Precautions
- ☐ Call emergency services if indicated

If an athlete is suspected of sustaining a more severe head or spine injury during a game or practice, an ambulance should be called immediately to transfer the patient to the nearest emergency department for further Medical Assessment.

Coaches, parents, trainers and officials should not make any effort to remove equipment or move the athlete until an ambulance has arrived, and the athlete should not be left alone until the ambulance arrives. After the emergency medical services staff has completed the Emergency Medical Assessment, the athlete should be transferred to the nearest hospital for Medical Assessment.

In the case of youth (under 18 years of age), the athlete's parents should be contacted immediately to inform them of the athlete's injury. For athletes over 18 years of age, their emergency contact person should be contacted if one has been provided.

Sideline Medical Assessment

If an athlete is suspected of sustaining a concussion and there is no concern for a more serious head or spine injury, the player should be immediately removed from the field of play.

Scenario 1: If a licensed healthcare professional is present

The athlete should be taken to a quiet area and undergo Sideline Medical Assessment using the Sport Concussion Assessment Tool 5 (SCAT5) or the Child SCAT5. The SCAT5 and the Child SCAT5 are clinical tools that should only be used by a licensed healthcare professional that has experience using these tools. It is important to note that the results of SCAT5 and Child SCAT5 testing can be normal in the setting of acute concussion. As such, these tools can be used by licensed healthcare professionals to document initial neurological status but should not be used to make sideline return-to-sport decisions in youth athletes. **Any youth athlete who is suspected of having sustained a concussion must not return to the game or practice and must be referred for Medical Assessment.**

In the case of national team-affiliated athletes (age 18 years and older), an experienced certified athletic therapist, physiotherapist or medical doctor providing medical coverage for the sporting event may make the determination that a concussion has not occurred based on the results of the SCAT5. In these cases, the athlete may be returned to the practice or game without a *Medical Clearance Letter*, but this should be clearly communicated to the coaching staff. Players that have been cleared to return to games or practices should be monitored for delayed symptoms. **If a concussion is suspected, or a player develops any delayed symptoms, the athlete should be removed from play and undergo medical assessment by a medical doctor or nurse practitioner.**

Scenario 2: If there is no licensed healthcare professional present

The athlete should be referred immediately for medical assessment by a medical doctor or nurse practitioner, and the athlete must not return to play until receiving medical clearance.

3. Medical Assessment

The medical assessment will determine whether the athlete is diagnosed with a concussion or not, and may be completed by a medical doctor or nurse practitioner. Athletes with a diagnosed concussion should be provided with a *Medical Assessment Letter* indicating a concussion has been diagnosed. Athletes that are determined to have not sustained a concussion should be provided with a *Medical Assessment Letter* indicating a concussion has not been diagnosed and the athlete can return to school, work and sports activities without restriction.
